01

### Alkaline Water is a Powerful Antioxidant

Antioxidants help protect our bodies from free radicals that can cause various health problems such as cancer and heart diseases.

02

### Alkaline Water Effectively Balances the pH Levels of the Body

The body tries to naturally maintain the acid-alkaline balance of your blood.

03

### Alkaline Water Promotes Better Hydration

The body can be hydrated more effectively by drinking alkaline water instead of everyday tap water.

04

### Alkaline Water Detoxes the Body

A primary benefit of drinking alkaline water is its ability to wash away toxins that may cause your body to develop diseases and illness.

05

### Helps Boost the Immune System

It is proven that regular intake of alkaline water will significantly help improve a person's immune system.

06

### Alkaline Water Will Help You Lose Weight

Drinking alkaline water naturally neutralizes the acid in the body and significantly helps in weight loss because fat storage is reduced.

07

### Alkaline Water Helps Fight Cancer

In simple terms, cancer cells do not live in an environment with a neutral pH level. Alkaline water is extremely useful because it helps prevent the growth of cancer cells.

08

### Alkaline Water Prevents the Development of Diabetes

In his book *Alkalize or Die*, Dr. Theodore Baroody recommended to "maintain a primarily alkaline-forming diet" to enhance pancreatic function. In Japan, Dr. Keiji Kuwabara has been treating diabetes using alkaline water for years now.

Psoriasis is a skin disease that occurs in various parts of the body when the immune system is threatened.
