

# APOLLOTEK 10 STAGE PURIFICATION PROCESS

DOUBLE THE CAPACITY OF OTHER RESIDENTIAL WATER SYSTEMS

**1 SOFTENING RESIN:**  
High capacity softener resin removes calcium & magnesium, which cause water to become hard.

**2 GAC Acid Washed Carbon:**  
Designed for reduction of tastes, odors, dissolved organic & chemicals.

**3 KDF Media:**  
KDF is water treatment media that removes chlorine, chlorine gas & heavy metals.

**4 Fine Garnet:**  
Reduces attrition and provides an excellent support bed for other high density medias.

**5 Gravel:**  
High grade sediment reduction, which acts like a clarifier, reduces turbidity.

**6 Far-Infrared rays:**  
Promote the growth and health of cells and also activate, revitalize and strengthen various organs in our bodies.

**7 Oxidation reduction potential, ORP:**  
ORP is the most important benefit of alkaline water. A negative ORP is desirable because it is very useful at attacking dangerous free radicals and stops them from harming healthy cells in the body.

**8 Tourmaline:**  
Is able to boost the immune system and promotes detoxification. the far infrared rays created by tourmaline help relieve stress, stimulate circulation and boost the immune system.

**9 Alkaline ceramic balls:**  
Alkaline water significantly helps the body absorb minerals because of its high oxygen content and also helps the body to fight against chronic diseases such as cancer, heart disease, diabetes and arthritis.

**10 Minerals:**  
Are made of nonmetal mineral tourmaline and calcium carbonate by nanometer commutation technology and agglomeration techniques, and used for activating, purifying and mineralizing drinking water.

## #1 VALVE IN THE WORLD

State of the Art Control head. Designed for residential and commercial applications.

- Double backwash to ensure media is clean.
- Highly efficient for less salt & water usage.
- Power cell memory retains all settings for weeks.

A COMPANY WITH HEART

THERE IS NO SUBSTITUTE

**PROUD TO BE SERVING  
MORE THAN 55,000+ CUSTOMERS**
