APOLLOTEK INTERNATIONAL

A COMPANY WITH HEART

Introducing the new advanced water purification system

Apollotek 5 Stage Purification Process

1. **Softening Resin**
   High capacity softener resin removes calcium and magnesium, which cause water to become hard.
2. **KDF Media**
   KDF is water treatment media that removes chlorine, chlorine gas and heavy metals.
3. **Final Garnet**
   Reduces attribution and provides an excellent support bed for other high-density medias.
4. **GAC Acid Washed Carbon**
   Designed for reduction of tastes, odors, dissolved organics and chemicals.
5. **Gravel**
   High grade sediment reduction which acts like a clarifier, reduces turbidity.
